NORTH EAGLES

SWISS INSTRUMENTS

HISTORY

In 1985, during a parachute competition in Italy, NORTH EAGLES was approached by the Commander of the Italian Parachute Brigade «Folgore». He was looking for a watch which would meet their demanding requirements.

A detailed specification list was established with the aim to provide a watch which would resist the service of these units.

NORTH EAGLES therefore developed their first compact and robust watch, a watch worthy of the elite. In honour of the Italian Brigade, the model was baptised «Folgore».

Since 1985, NORTH EAGLES has equipped elite units of the entire world with their watches.

All watches are developed in collaboration with these units and tested under the same extreme conditions.

As a result of this first success, other service units have also asked to be equipped with NORTH EAGLES watches. Today NORTH EAGLES is supplying several elite units such as the US Secret Services, the French GIGN, UN troops and missions, United Arab Emirates GHQ, Italian, British, French, American, Algerian air force pilots and many others around the world.

NORTH EAGLES is specialized in military watches. All our watches are manufactured in Switzerland and have been approved and tested by over 1000 military units around the world.

YOU ARE UNIQUE

Your Country is unique, your Flag is unique, your Armed Forces are unique, therefore the Watches fitting your soldiers must also be unique.

We won't propose to you an existing watch, but we will create it together with your military specialists, our watch makers and our designers. So, your troops will wear an adapted and exclusive watch.

Feel free to contact us in order to establish with you watch specification. That's how many units have developed with us, watches fitted with special functions or simple and extremely sturdy watches.
